

ROULE RODRIGUES

OWNER'S MANUAL

Your complete guide to running the website & admin dashboard

Premium scooter & vehicle rental marketplace · Rodrigues Island

Edition 2 · June 2026

1. Getting Started

Logging in

- Open `roule-rodrig.vercel.app/admin` in any browser.
- Enter your admin password. It is set by the **ADMIN_PASSWORD** env var in Vercel — never written in the code.
- Sessions now expire after 30 days and log out automatically if you change the password.
- On a phone, tap the **■ menu** (top-left) to move between sections; it closes when you pick one.

The Golden Rule — two kinds of sections

This is the most important thing to understand:

- **“Save Changes” sections (Content group):** edit, then click the yellow **Save Changes** button (top-right) or edits are lost. These are: Announcement, Hero, Fleet, Pricing, Contact Info, Featured Reviews, Island Map, Trip Planner, Ride Routes, **Getting Around**, **Stay·Eat·Do**, **FAQ**, Events, Useful Numbers, Sponsors, Branding.
- **Live sections (save instantly):** every action saves immediately. These are: Dashboard, Bookings, Enquiries, Customer Reviews, Waitlist, **Listing Leads**, **Owner Applications**, Partners, Marketplace, **Taxi & Transport**, Gallery.

Uploading photos

Anywhere you see **Upload / Add photos**, choose files from your phone or computer — they upload automatically. Many sections now accept **several photos**: the first is the cover, you can reorder or ★-set the cover, and remove any photo with the × button.

2. Overview — Daily Running

Dashboard

- Stat cards: Total Bookings, Pending, Confirmed, Enquiries (tap one to jump there).
- **Today's Reminders:** tomorrow's pickups and today's returns, each with a green **WhatsApp** button.
- Quick Actions: shortcuts to the most-used sections.

Bookings

- Every booking request from the website, newest first.
- Change status: **Pending** → **Confirmed** → **Completed / Cancelled**.
- **Confirming a booking is the key action** — it blocks those dates on the public calendar and triggers reminder emails.
- Per-vehicle **Units** are respected: a date only shows ‘full’ once every unit of that model is booked.

Enquiries & Customer Reviews

- **Enquiries:** messages from the Contact form, each with a **■■** delete button.
- **Customer Reviews:** customer-submitted scooter reviews wait here. Approve → shows publicly; Reject → hidden.

Waitlist

- Emails captured from the “Stay in the loop” section.
- **Copy emails, Export CSV**, or delete entries.

Listing Leads (NEW)

- Counts every **Book / Enquire** tap on a Stay-Eat-Do listing and every **WhatsApp / Call** tap on a taxi driver.
- Shows totals, a per-listing breakdown (last 30 days + all-time) and recent activity.
- Use these numbers to **invoice businesses** for featured placement or pay-per-lead.

Owner Applications (NEW)

- Scooter owners who applied through **/list-your-scooter** land here.
- See their contact, area and scooters; tap WhatsApp/email to reach them; **Approve / Reject** or delete.

3. Business — Make Money

Partners + referral toolkit

- Hotels / guesthouses / agencies that refer customers. Each gets a referral code and a commission %.
- Open a partner to see their **Referral Toolkit**: a trackable link (**?ref=CODE**), an auto-generated **QR poster**, copy-link and WhatsApp-share buttons.
- Anyone who scans/clicks is attributed automatically — the booking form fills their code in for them (no typing).
- Send the hotel their **Partner Dashboard** link (**/partner?code=CODE**) so they track their own bookings & earnings — no login.

Marketplace (Local Deals)

- Local businesses shown in “Local Deals”: name, category, description, offer, photo, hours, contact, WhatsApp, Google Maps link.
- Service options (Delivery / Pickup / Dine-in) and a ★ **Featured** paid-placement slot.

Stay · Eat · Do (NEW)

- A curated hotels / restaurants / activities section, separate from Local Deals — with a **master ON/OFF toggle**.
- Per place: photo, category, description, optional website/Maps link and a **WhatsApp number** (adds a “Book / Enquire” button).
- Mark any place **Sponsored** → it sorts first with a gold badge (your paid-placement slot).
- Every Book/Enquire click is recorded in **Listing Leads**.

Taxi & Transport (NEW)

- A directory of independent local drivers shown at **/taxi** (linked in the top nav).
- Per driver: photo, vehicle, areas, languages, starting rate, WhatsApp/phone, and a ★ **Featured** top slot.
- **Driver reviews**: tourists rate drivers 1–5★; reviews wait for your approval in the same section.
- Every WhatsApp/Call tap is recorded in Listing Leads. **Note**: you are a scooter-rental platform — taxis are listed for convenience only (the page carries a disclaimer).

4. Content — The Website Itself

*Remember: everything in this group needs the **Save Changes** button.*

Announcement

- The bold band at the very top (megaphone + moving shine).
- Add **multiple messages** that rotate; set the colour; toggle on/off.

Hero

The big opening screen: eyebrow, the 3-line headline, subheadline, background image.

Fleet (+ Categories + Units)

- **Vehicle Categories panel:** turn Scooters / Cars / E-Bikes / Motorbikes / Bicycles / Kayaks ON or OFF. Filter tabs appear when 2+ categories have vehicles.
- Per vehicle: **several photos**, name, badge, tagline, price, category, **Units (how many you own)**, description, and an Available/Unavailable toggle.

Pricing · Contact · Gallery · Featured Reviews

- **Pricing:** daily / 3-day / weekly tariff per vehicle.
- **Contact Info:** phone, one or more WhatsApp numbers, email, location, hours — powers the green floating button + booking confirmation.
- **Gallery:** upload photos for the site gallery (saves instantly).
- **Featured Reviews:** testimonials you write yourself (separate from customer reviews).

Island Map · Getting Around

- **Island Map:** points of interest (name, category, coordinates, description, photo). Tapping a place on the site opens Google Maps directions.
- **Getting Around (NEW):** the bus / taxi / scooter comparison card. Toggle on/off; edit each option's icon, text and button; mark one as the highlighted “Best way”.

Stay·Eat·Do · FAQ

- **Stay·Eat·Do:** see Business above — edited here too (toggle, title, places, Sponsored, WhatsApp).
- **FAQ (NEW):** questions & answers shown on the site (also boosts Google with rich results). Toggle, reorder, add/remove. Ships with sensible scooter-rental defaults — edit the insurance/fuel/deposit wording to match your real policy.

Trip Planner · Ride Routes · Events · Useful Numbers

- **Trip Planner:** the real places the AI arranges into itineraries (name, emoji, slot, duration, tip, photo).
- **Ride Routes:** scenic routes with stops + a Google Maps link + photo.
- **Events:** festivals/markets (hidden until you add one).
- **Useful Numbers:** tap-to-call Emergency / Taxi / Other directory.

Sponsors / Ads · Branding & Social

- **Sponsors:** a logo strip near the footer with a master toggle — sell these slots.
- **Branding:** upload your logo and add Instagram / Facebook / TikTok / WhatsApp links.

5. Legal & Trust

Your legal pages

- Four public pages, linked in the footer: **Terms & Conditions**, **Privacy Policy**, **Refund & Cancellation**, **Disclaimer**.
- Plus a **Scooter Owner Agreement** (linked from the partner onboarding page).
- They establish the key point: you only facilitate **scooter rentals** — you are **not** a taxi/transport/travel operator, and taxi + Stay·Eat·Do listings are informational only.

Important: these are clear, ready-to-use templates — have them reviewed by a professional familiar with Mauritius/Rodrigues law before you take real payments.

Booking acceptance

The booking form has a required “**I agree to the Terms & Rental Policy**” checkbox — a guest cannot submit until they tick it, which protects you on every booking.

Recruiting scooter owners

- Share **/list-your-scooter** — owners read the benefits, accept the Owner Agreement and apply.
- Applications appear in **Owner Applications** for you to approve and onboard.

6. Common Tasks — Step by Step

Confirm a booking

- Bookings → find the request → click **Confirmed**. Dates are blocked; the customer gets a reminder before pickup.

Give a hotel its referral kit

- Partners → add the hotel → open it → Referral Toolkit.
- Print the QR for their reception and send them the link + their **/partner** dashboard link.

Add a place to Stay·Eat·Do and make it sponsored

- Stay·Eat·Do → Add Place → category, photo, description, WhatsApp.
- Tap **Make sponsored** → it jumps to the top with a badge. **Save Changes**.

See how many taxi/Stay·Eat·Do leads you got

- Listing Leads → read the per-listing 30-day and all-time counts → invoice accordingly.

Set the real WhatsApp number (floating button)

- Contact Info → enter your number with country code, e.g. **+230 5912 3456**. **Save Changes**.

7. Behind the Scenes (one-time setup)

Environment variables in Vercel

- **ADMIN_PASSWORD** — your admin login (required; no default in production).

- **SUPABASE_SERVICE_ROLE_KEY** — secret key that lets the admin read/write data securely. **Required** now that the database is locked down.
- **SESSION_SECRET** (optional) — rotate it to instantly log out all admin sessions.
- **RESEND_API_KEY** + **OWNER_EMAIL** (optional) — turns on booking confirmation + reminder emails.
- **NEXT_PUBLIC_SITE_URL** — set this when you connect a custom domain (updates sitemap, share links, SEO).

Security (already done for you)

- The database is protected so the public can only do what's intended (submit a booking/review/enquiry, read public content) — no one can read your customer data or change the site.
- Security headers, rate limiting (anti-brute-force/spam) and a constant-time login are all in place.
- Health check: **/api/health** — point an uptime monitor at it to be alerted if the site or database goes down.

Analytics & Google

- Vercel → your project → **Analytics** + **Speed Insights** tabs → Enable. The Analytics → **Events** tab shows lead/contact clicks.
- **Search Console**: verified; submit sitemap.xml (a “couldn't fetch” right after is normal). Create a **Google Business Profile** to appear on Maps.

8. Troubleshooting

Problem	Fix
Admin won't save / login fails	Make sure ADMIN_PASSWORD and SUPABASE_SERVICE_ROLE_KEY are set in Vercel
WhatsApp button doesn't show	Set a real number (no XXXX) in Contact Info and Save.
A photo shows as a broken icon	The image file is missing — re-upload it in the relevant section.
Booking emails not sending	Add RESEND_API_KEY + OWNER_EMAIL in Vercel (section 7).
A new section isn't on the site	Empty/!toggled sections (Stay·Eat·Do, Events, FAQ...) stay hidden until you add content
Edits disappeared	You were in a Content section and didn't click Save Changes.
Leads show 0	They only count once visitors tap Book/Enquire or contact a driver.

9. What's Next (roadmap ideas)

Bigger features for when you're ready — each is its own project:

- **Online deposit / payment** (MCB Juice, MIPS or Stripe) — take real reservations + automate commission and refunds. The biggest next step.
- **Booking add-ons / upsells** — extra helmet, hotel delivery, GoPro, raising the average order value.
- **Blog / island guides** for SEO — pull free Google traffic using your planner content.

- **Lead dashboard** → **invoicing** — turn the Listing Leads counts into automatic monthly invoices for businesses.
